caribcoin

Caribbean roots. Global participation.

Lightpaper / The Caribbean's culture token.

CARIB / ON SUI / Version 3.0.3 / September 2026

In development. No token sale or mainnet address has been announced.

The Caribbean is more than a place. It is a culture the world carries: in its music, its carnivals, its food, its families on every continent, and the visitors who keep coming back. The world knows the Caribbean. But nothing belongs to all of it.

CaribCoin changes that. CARIB is one open token for the whole Caribbean and everyone connected to it. It lives on Sui, works with existing wallets, and is open to anyone, anywhere.

A token, not an app: portable across every border, owned by its holder, open to anyone who wants to build on it.

It is not a national currency or a government project. It is a shared cultural asset that belongs to the people who choose it.

What we believe

- **Culture first. Utility follows.**
- **One token. Every island.**
- **Participation, not permission.**
- **Fair by design.**
- **Built in the open.**
- **Value from use, not promises.**

How CARIB is used

Belong. Earn CARIB by taking part: carnival moments, creator drops, community events. Rewards go to real participation, not wallet farming.

Hold and send. Keep CARIB in any compatible Sui wallet. Send it to anyone, on any island or in any city.

Use it. As the community grows, CARIB gains practical uses: rewards after a stay or purchase, discounts with participating businesses, fete and event access, creator experiences, and benefits across Anansi products. Each offer is set and funded by the business or creator making it.

Build. CARIB is a standard Sui coin. Anyone can build apps that recognize it.

Fair by design

Fixed supply: 10,000,000,000 CARIB.

Allocation	Share	CARIB	Rules
Community and culture rewards	50%	5.0B	Earned through participation; never sold; at most 10% of this pool released per year against a published annual budget.
Public distribution	15%	1.5B	At launch, same terms for everyone; no discounts, no private rounds; method (free claim or open sale) decided with legal counsel.
Liquidity	5%	0.5B	Paired with real USDC; LP tokens locked and the lock published.
Treasury	15%	1.5B	Public multisig with named signers; every spend published; at most 20% of this pool per year.
Team and contributors	10%	1.0B	1-year cliff, 4-year vesting, enforced by an on-chain vesting contract.
Creators and cultural partners	5%	0.5B	Milestone-based and publicly disclosed.

- No early-backer or private discounted round; any outside capital comes from the treasury on public terms.
- Launch circulation is at most 20%; no insider unlock at launch.

Guardrails

- All CARIB minted at genesis, then mint authority permanently removed.
- Treasury, vesting and LP-lock addresses published.
- Any allocation change announced before it takes effect.

Road to Spicemas 2027

- Oct—Dec 2026: charter, community channels, legal review.
- Jan—Mar 2027: creator and mas-band partners, testnet contracts, audit booked.
- Apr—Jun 2027: audit complete, mainnet deployment and verification record, liquidity plan.
- July 2027: token live; public distribution opens.
- Spicemas, Grenada (second week of August 2027): first culture moment, with community rewards, fete perks and creator drops.

The token launches before carnival, not at it. Spicemas, Grenada's carnival, is where the culture meets the token for the first time. Then Brooklyn, Miami, and every island after.

The ambition

The most widely held and used token in the Caribbean. The one asset every island recognizes. The easiest way for the world to belong to the region.

Live global. Belong local. One World. One Caribbean. One CaribCoin.

Risk

In development. No token sale or mainnet address has been announced. CARIB can lose some or all of its value; liquidity may be limited; wallet and software failures can cause permanent loss. CARIB grants no equity, dividends, yield or voting rights. Availability depends on wallet, market and jurisdiction. Official addresses are published only at https://caribcoin.org. Full detail is in the whitepaper.
